

Arabic Handwritten Recognition Sketchs

Sondos Aabed – UX nd project 1
/ 22.3.2025

Sketch 1: Select Image

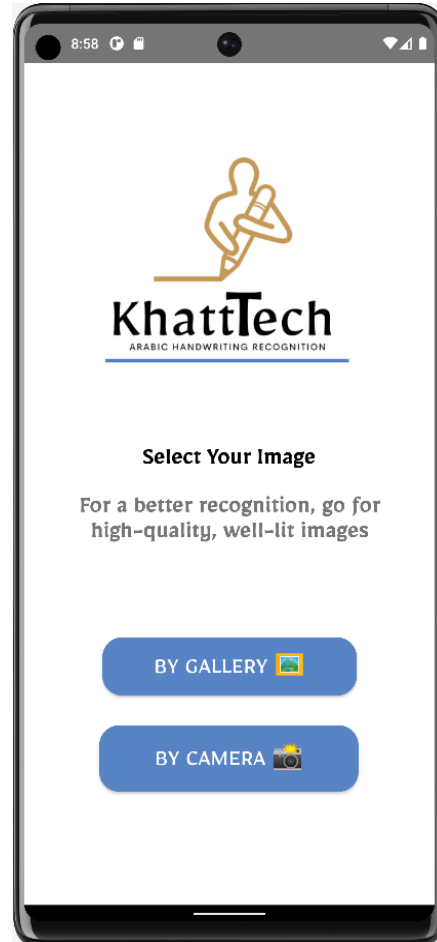

Purpose: Let users upload a clear image of Arabic handwritten recognition

User action: choose an image from gallery or take a new one via Camera

Applied design principles:

- **Recognition over recall:** clear buttons with icons
- **Guidance:** tip for high-quality images improves results
- **User control:** freedom to select source.

Benefit: reduce output error, smooth start

Sketch 2: Home Page

Purpose: Display recognized text; allow edits, download, or sharing.

User action: Double-click to edit words, then Download or Share or Restart.

Applied design principles:

- **Direct manipulation:** Easy text corrections.
- **Error prevention:** user can fix OCR mistakes.
- **Minimalist design:** only key actions shown

Benefit: Gives users control, simplifies corrections, supports flexible use of text.
